

My Bike Collection User Guide

1. Bike Details: In each of these fields, you should enter the details of your motorbike. If you are adding a motorbike, you have to put in the 'Make' and the 'Model' or otherwise your bike will not be added to the list. Upon entering the model name, the program will automatically capitalize it and you cannot enter the same model twice. In the other fields 'Size', 'Year, and 'Cost' you can only type numbers in. 'Size' field refers to the motorbikes engine size, when adding your engine size, the program will display the cubic centimetres (cc) for you. The 'Year' is when the motorbike model was produced, only four numbers can put into this field (i.e. 1997 or 2016, etc.). The 'Cost' value is how much the bike costs and upon enter a number the dollar sign '\$' is automatically added for you.

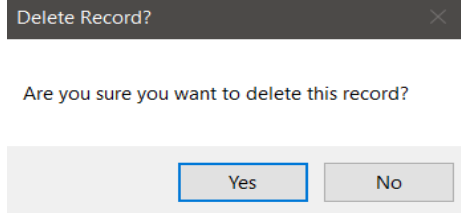

Make:	<input type="text" value="Honda"/>
Model:	<input type="text" value="HRX"/>
Size:	<input type="text" value="999cc"/>
Year:	<input type="text" value="2014"/>
Cost:	<input type="text" value="\$28000"/>

2. Add button allows you to add your motorbike to the list but you must have at least the make and model of the bike typed in their respective fields. In addition, if you try to add a bike to the list that has the same model as another motorbike on the list you will not be able to add that bike.
3. Update button allows you to edit bikes already on the list by simply clicking on a motorbike from the list, rewriting the field you want to change and then clicking the update button. Remember you cannot have more than one bike with same model number.
4. Save button, when you have finished adding motorbikes to your list click the save button and the next time you open 'My Bike Collection' your list will load up for you to see. If you see a message box, you may have forgotten to make changes before clicking the save button.

My Bike Collection User Guide

5. Delete button allows you to remove a motorbike from your list. First click on the bike you want to remove and then click delete. Do not worry if you accidentally click on the delete button by mistake, the program will ask you to confirm before it deletes it.

6. The status bar shows messages as you use the program for example when you add a motorbike it will show "Record added" and then display how many bikes you have in your list.
7. Motorbike List, this is where all motorbikes are displayed with all their details. When clicking on one of your motorbikes its details are put back into their respective fields in the bike details section. If you are unable to see the full name of the manufacture or model of the motor bike, you can move your mouse over the line between the column names and simply double-click (see diagram below).

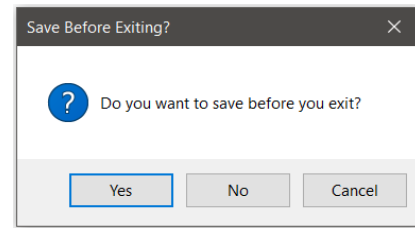

Here

Make	Model	Size	Year	Cost
Harley-Da...	HOG...	1000cc	2000	\$29999
Honda	HRX	999cc	2014	\$28000

Make	Model	Size	Year	Cost
Harley-Davidson	HOG...	1000cc	2000	\$29999
Honda	HRX	999cc	2014	\$28000

and voilà!

8. The Menu Bar has two drop down menus 'File' and 'Help'. In the File menu there are two options Save, which saves the list and Exit, which closes the program. When you close the program, a dialog box will ask you to save your work before quitting just in case you forget, but if you have already saved your work, it will just ask you if you are sure that you want to quit. In the Help menu, there is an option to open this user guide.

9. Clear button used to clear the text that you have entered into the bike details.

Before Clear

Enter Bike Details

Clear

Make: Honda

Model: HRX

Size: 999cc
